Doctors Treating Overweight Patients

Our medical expertise: You deserve the care and concern of a medical professional. We offer a treatment program backed by professional medical expertise. We apply the American Society of Bariatric-Physicians Guidelines and Standards for Excellence in Treating Obesity. Personalized care and concern provided by medical professionals.

Our use of appropriate medications: We dispense FDA approved medications. When treating obesity with medication, we monitor your progress on a monthly basis to ensure that it is used safely and effectively.

Our holistic approach: Bariatric medicine addresses issues of diet-behavior and weight maintenance, as well as emotional responses to obesity. We also consider the increased risk factors—heart disease, diabetes, stroke, hypertension, arthritis and cancer—that stem from obesity.

Our compassion: We believe that no one should undergo a weight treatment program alone. When you enter our office, you can be assured that we will treat you with respect as a fellow human being. Together we can achieve results

Our office policies: We take appointments, but also accept patients on a walk-in-basis. We maintain these policies because we are committed to providing accessible medical care for everyone.
